INTERNATIONAL SOLIDARITY

We stand with the student's struggle and their strike!

Austerity everywhere

Everywhere, the situation is the same: the bourgeoisie and the reactionaries are charging headlong into ever more devastating **austerity policies.** Education, hospitals, and housing are being stripped of their funding, while the military and the police are being flooded with so much money they don't know what to do with it.

The youth is being sacrificed for the sake of industrials of death that organize their exploitation and repression, all the while participating in **wars and genocides!**

Support for La CRUES

Across the Atlantic, in the regions known as Quebec and Canada, our comrades in La CRUES have been mobilizing for several months now against austerity, the commodification of higher education, and the resulting misery.

The culmination of this massive mobilization will be the Indefinite General Strike of students! In France, we would call this a massive boycott of classes, which is taking place alongside blockades, artistic actions, activist discussions, and picket lines.

This Friday the 13th, after a week of protests, community classes, and activist art workshops, the students **poured into the streets of Tiohtià:ke** (Montreal) in a determined, joyful, and impressive protest!

Against Cop violence

Just as here in France, they found themselves facing unbridled police violence, which endangered the protesters in an attempt to break the movement's momentum: Our unions strongly condemn this violence, which is proof—if any were needed—that the police institution, wherever it operates, is nothing more than the repressive arm of the bourgeoisie and the state.

Just as La CRUES did for the French social movement not long ago, we offer our full support to the ongoing student uprising. The fight against the capitalist vision of the university, which is based on austerity, selective admissions, precarious working conditions, and discrimination, is an international struggle: to succeed, we must stand in solidarity with one another!

As shown by our common demands, mutual inspiration, and shared slogans, our struggles are international and we reinforce one another!

solidarity with our comrades all over the world!

Partout un raz-de-marée contre l'austérité!
